

FlexMeasures Technical Steering Committee

September 1st 2022

Agenda

- Welcome & Short introduction to FlexMeasures
- Version 0.11 is out!
- Preview: Replay, 1st out-of-the-box case
- Roadmap: Support out-of-the box cases (90%) as well as power users
- Q&A

FlexMeasures is the intelligent & developer-friendly EMS to support real-time energy flexibility apps.

Go green in daily operations, stay in control.

- Smart industry
- Smart city

The matching challenge

Use case: SteerOnCO₂ at Rijnland Water Board

We help water board Rijnland to only run their centrifuges for sludge dehydration when the CO₂ footprint in the grid is low.

Use case: SteerOnPrice & SteerOnSolar at V2G@Home

We optimize (dis)charging of Nissan Leaf cars with Wallbox chargers to save costs and use solar power, with zero user interaction needed.

FlexMeasures - simple

Developer support

- I need help with integrating real-time data and continuously computing new data
- It's hard to correctly model data with different sources, resolutions, horizons and even uncertainties
- I want to build new features quickly, not spend days solving basic problems

FlexMeasures - integration

Version 0.11 is out!

- More useful & customizable data views
- Completed the Docker-compose stack (background job workers)
- Get data in any resolution (API)

Preview 0.12: Replay

Sun Jun 05 2022 12:00:00 GMT+0200
(Central European Summer Time)

FlexMeasures technology is created by **Seita Energy Flexibility**, in cooperation with **AI Engineering** © 2022. [About FlexMeasures](#). [Credits](#). This app is running since 46 seconds ago on version 0.11.0.dev23.

Preview 0.12: Towards 1st out-of-the-box use case: Battery plus solar & network constraint

Use case:

- Battery
- Solar power
- (network constraint)
- (prices)

TODO: Tutorial

Day ahead prices (EUR/MWh)

Discharging (MW)

Source

- Capacity
- Seita
- toy-user

Discharging: 0.5 MW

Source: Seita

Model:

Roadmap: Out-of-the-box use cases vs power users

Out of the box – the 90 % cases

- Battery/EV + solar (self-consumption)
- Battery/EV + solar + congestion (also grid support)
- Solar + Heat pump (self-consumption & comfort)
- ...
- **FM:** Pre-made schedulers, Setup wizard, excellent tutorials

Power users – bring your own

- Simulations (researchers, investment decision moments)
- New services (e.g. startups) with custom scheduling
- Microgrids
- Industry
- **FM:** Examples, support

Roadmap: More details
